Product Datasheet

Human TNNC1(Troponin C Type 1, Slow) Microsample ELISA Kit EBT-ELK4952MS

Artikelname	Human TNNC1(Troponin C Type 1, Slow) Microsample ELISA Kit
Artikelnummer	EBT-ELK4952MS
Hersteller Artikelnummer	ELK4952MS
Alternativnummer	EBT-ELK4952MS-96, EBT-ELK4952MS-48, EBT-ELK4952MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	4000 pg/mL
Detektionsbereich	62.5-4000 pg/mL
Sensitivitaet	27.7 pg/mL
UniProt	P63316
Proben	Serum, plasma, tissue homogenates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cardiovascular biology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human TNNC1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human TNNC1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human TNNC1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human TNNC1 in the samples is then determined by comparing the OD of the samples to the standard curve
