Human TAP(Trypsinogen Activation Peptide) ELISA Kit EBT-ELK5019

Artikelname	Human TAP(Trypsinogen Activation Peptide) ELISA Kit
Artikelnummer	EBT-ELK5019
Hersteller Artikelnummer	ELK5019
Alternativnummer	EBT-ELK5019-96, EBT-ELK5019-48, EBT-ELK5019-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10000 pg/mL
Detektionsbereich	156.25-10000 pg/mL
Sensitivitaet	53.3 pg/mL
Proben	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Infection immunity, Immune molecule, Hepatology, . Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human TAP. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human TAP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human TAP in the samples is then determined by comparing the OD of the samples to the standard curve
