Product Datasheet

Human IgG1(Immunoglobulin G1) ELISA Kit EBT-ELK5154

Artikelname	Human IgG1(Immunoglobulin G1) ELISA Kit
Artikelnummer	EBT-ELK5154
Hersteller Artikelnummer	ELK5154
Alternativnummer	EBT-ELK5154-96, EBT-ELK5154-48, EBT-ELK5154-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	400 µg/mL
Detektionsbereich	6.25-400 µg/mL
Sensitivitaet	2.83 µg/mL
UniProt	P01857
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Immune molecule,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human IgG1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human IgG1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human IgG1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human IgG1 in the samples is then determined by comparing the OD of the samples to the standard curve
