Product Datasheet

Human 20S-PSM(20S-Proteasome) ELISA Kit EBT-ELK5359

Artikelname	Human 20S-PSM(20S-Proteasome) ELISA Kit
Artikelnummer	EBT-ELK5359
Hersteller Artikelnummer	ELK5359
Alternativnummer	EBT-ELK5359-96, EBT-ELK5359-48, EBT-ELK5359-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	100 ng/mL
Detektionsbereich	1.57-100 ng/mL
Sensitivitaet	0.66 ng/mL
Proben	Tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Enzyme & Kinase,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human 20S-PSM. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human 20S-PSM. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human 20S-PSM, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human 20S-PSM in the samples is then determined by comparing the OD of the samples to the standard curve
