Product Datasheet

Rat GnRH(Gonadotropin Releasing Hormone) ELISA Kit EBT-ELK5453

Artikelname	Rat GnRH(Gonadotropin Releasing Hormone) ELISA Kit
Artikelnummer	EBT-ELK5453
Hersteller Artikelnummer	ELK5453
Alternativnummer	EBT-ELK5453-96, EBT-ELK5453-48, EBT-ELK5453-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Konzentration	1000 pg/mL
Detektionsbereich	15.63-1000 pg/mL
Sensitivitaet	5.13 pg/mL
UniProt	P07490
Proben	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Endocrinology, Reproductive science, Neuro science, Genetic science, Hormone metabolism, . Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Rat GnRH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat GnRH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat GnRH in the samples is then determined by comparing the OD of the samples to the standard curve
