### Rat FGa(Fibrinogen Alpha) ELISA Kit EBT-ELK5747

|                          |  |
|--------------------------|--|
| Artikelname              | Rat FGa(Fibrinogen Alpha) ELISA Kit              |
| Artikelnummer            | EBT-ELK5747                                      |
| Hersteller Artikelnummer | ELK5747  |
| Alternativnummer         | EBT-ELK5747-96, EBT-ELK5747-48, EBT-ELK5747-96X5 |
| Hersteller               | ELK Biotechnology                                |
| Kategorie                | Kits/Assays                                      |
| Spezies Reaktivität      | Rat  |
| Konzentration            | 100 ng/mL  |
| Detektionsbereich        | 1.57-100 ng/mL                                   |
| Sensitivitaet            | 0.57 ng/mL                                       |
| UniProt                  | <a href="#">P06399</a>                           |
| Proben                   | Plasma.  |

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat FGa. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat FGa. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat FGa, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat FGa in the samples is then determined by comparing the OD of the samples to the standard curve
