Product Datasheet

Cattle FETUA(Fetuin A) ELISA Kit EBT-ELK5908

Artikelname	Cattle FETUA(Fetuin A) ELISA Kit
Artikelnummer	EBT-ELK5908
Hersteller Artikelnummer	ELK5908
Alternativnummer	EBT-ELK5908-96, EBT-ELK5908-48, EBT-ELK5908-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Bovine
Konzentration	400 ng/mL
Detektionsbereich	6.25-400 ng/mL
Sensitivitaet	2.45 ng/mL
UniProt	P12763
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle FETUA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle FETUA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle FETUA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Cattle FETUA in the samples is then determined by comparing the OD of the samples to the standard curve
