Product Datasheet

Cattle IFNa(Interferon Alpha) ELISA Kit EBT-ELK5981

Artikelname	Cattle IFNa(Interferon Alpha) ELISA Kit
Artikelnummer	EBT-ELK5981
Hersteller Artikelnummer	ELK5981
Alternativnummer	EBT-ELK5981-96, EBT-ELK5981-48, EBT-ELK5981-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Bovine
Konzentration	1000 pg/mL
Detektionsbereich	15.63-1000 pg/mL
Sensitivitaet	5.4 pg/mL
UniProt	P07348
Proben	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle IFN α . Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle IFN α . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle IFN α , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Cattle IFN α in the samples is then determined by comparing the OD of the samples to the standard curve
