Human ACCPA(anti-cyclic citrullinated peptide antibody) ELISA Kit EBT-ELK9202

Artikelname	Human ACCPA(anti-cyclic citrullinated peptide antibody) ELISA Kit
Artikelnummer	EBT-ELK9202
Hersteller Artikelnummer	ELK9202
Alternativnummer	EBT-ELK9202-96, EBT-ELK9202-48, EBT-ELK9202-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	100 ng/mL
Detektionsbereich	1.57-100 ng/mL
Sensitivitaet	0.55 ng/mL
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung	Assay Type: Sandwich. Assay length: 3.5h. Research Area: Autoimmunity. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human ACCPA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human ACCPA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human ACCPA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human ACCPA in the samples is then determined by comparing the OD of the samples to the standard curve
