Human GSDMA (Gasdermin A) ELISA Kit EBT-ELK9886

Artikelname	Human GSDMA (Gasdermin A) ELISA Kit
Artikelnummer	EBT-ELK9886
Hersteller Artikelnummer	ELK9886
Alternativnummer	EBT-ELK9886-96, EBT-ELK9886-48, EBT-ELK9886-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.123 ng/mL
UniProt	Q96QA5
Proben	serum, plasma, tissue homogenates

Anwendungsbeschreibung	Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human GSDMA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human GSDMA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human GSDMA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human GSDMA in the samples is then determined by comparing the OD of the samples to the standard curve
