## Product Datasheet

### Recombinant 2019-nCoV Nucleocapsid Protein V2 EBT-EPT069

Artikelname	Recombinant 2019-nCoV Nucleocapsid Protein V2
Artikelnummer	EBT-EPT069
Hersteller Artikelnummer	EPT069
Alternativnummer	EBT-EPT069-1
Hersteller	ELK Biotechnology
Kategorie	Proteine/Peptide
Produktbeschreibung	Recombinant SARS-CoV-2 Nucleocapsid Protein is produced by our E.coli expression system and the target gene encoding Met1-Ala419 is expressed with a 6His tag at the N-terminus....
Molekulargewicht	Molecular weight: 49.4kDa. Apparent molecular weight: 50-60kDa, reducing conditions
UniProt	QHD43423.2
Reinheit	Greater than 95% as determined by reducing SDS-PAGE.

Anwendungsbeschreibung

Background: Coronavirus N protein is required for coronavirus RNA synthesis, and has RNA chaperone activity that may be involved in template switch. Nucleocapsid protein is a most abundant protein of coronavirus. N protein packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP) and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. Plays an important role in enhancing the efficiency of subgenomic viral RNA transcription as well as viral replication. Because of the conservation of N protein sequence and its strong immunogenicity, the N protein of coronavirus is chosen as a diagnostic tool
