| Immunogen                | Synthesized phosho peptide around human Myosin IIa (Ser1943)                                                                                                                                                                                                  |
| Produktbeschreibung      | This gene encodes a conventional non-muscle myosin, this protein should not be confused with the unconventional myosin-9a or 9b (MYO9A or MYO9B). The encoded protein is a myosin IIA heavy chain that contains an IQ domain and a myosin head-like domain... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
