| Produktbeschreibung      | Receptor for TNFSF6/FASLG. The adapter molecule FADD recruits caspase-8 to the activated receptor. The resulting death-inducing signaling complex (DISC) performs caspase-8 proteolytic activation which initiates the subsequent cascade of caspases (asp... |
| Molekulargewicht         | 17.6                                                                                                                                                                                                                                                          |
