| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                            |
| Produktbeschreibung      | Probable transcription factor that binds specifically to the core DNA sequence 5-GGTAA-3. May act as a molecular switch in response to light signals. Source: Recombinant protein corresponding to aa1-406 from arabidopsis thaliana GT-1, fused to His-T... |
| Molekulargewicht         | 50.7                                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">Q9FX53</a>                                                                                                                                                                                                                                       |
| Reinheit                 | 90% (SDS-PAGE)                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                           |
