| Produktbeschreibung      | Probable hormone. Source: Recombinant protein corresponding to aa24-111 from human RETNLB, fused to His-Tag at N-terminal, expressed in Yeast. Molecular Weight: ~11.4kD AA Sequence: QCSLDSVMDKKIKDVLNSLEYSPSPISKKLSCASVKSQGRPSSCPAGMAVTGC ACGYGCGSWDVQLET... |
| Molekulargewicht         | 11.4                                                                                                                                                                                                                                                           |
| UniProt                  | <a href="#">Q9BQ08</a>                                                                                                                                                                                                                                         |
| Reinheit                 | ~90% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                             |
