| Alternativnummer         | USB-C5028-1                                                                                                                                                                                                                                                   |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Applikation              | IF, WB                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | Tri-peptide chloromethylketones have been utilized extensively to irreversibly inhibit various serine proteases. Among the most common chloromethylketones are FPRCK (Phe-Pro-Arg-chloromethylketone), which is a rapid inhibitor of a-thrombin and EGRCK ... |
| Molekulargewicht         | 846                                                                                                                                                                                                                                                           |
| Reinheit                 | Fluorescein labelled FPRCK is prepared by the method of Williams et al. (11).                                                                                                                                                                                 |
| Formulierung             | Supplied as a liquid in DMSO. Lebeled with Fluorescein isothiocyanate (FITC)                                                                                                                                                                                  |
