| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Produktbeschreibung      | Location: 14aa near the center of human Ipaf (1,2). Applications: The peptide is used for blocking the activity of Ipaf (CARD12/CLANA) antibody. It usually blocks the antibody activity completely in Western blot by incubating the peptide with equal v... |
| Reinheit                 | Purified                                                                                                                                                                                                                                                      |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2, 0.1% BSA, 0.02% sodium azide.                                                                                                                                                                                            |
