## Product Datasheet

### **ICOS (Inducible T-cell Costimulator, Inducible T-cell Co-stimulator, Activation-inducible Lymphocyte Immunomediatory Molecule, AILIM, CD278, CVID1, MGC39850), Clone: [7H152], Mouse, Monoclonal USB-I0650-01A1**

|                          |                                                                                                                                                                                                                                                               |

| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, FC                                                                                                                                                                                                                                                     |
| Immunogen                | Human HPB-MLT cells and ICOS-mulg fusion protein                                                                                                                                                                                                              |
| Produktbeschreibung      | The inducible costimulator CD278 (ICOS, T cell activation molecule H4) is similar to human CD28 (24% homology), and plays an analogous role in the T cell activation process. Secondary signaling through CD28 or ICOS results in discrete cytokine secret... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [7H152]                                                                                                                                                                                                                                                       |
| Reinheit                 | Purified by Protein A affinity chromatography from tissue culture supernatant.                                                                                                                                                                                |

Formulierung

Supplied as a liquid in 50mM sodium phosphate, pH 7.5, 100mM potassium chloride, 150mM sodium chloride. No preservative added.
