## Product Datasheet

### **Iduronidase, a-L- (alpha-L-Iduronidase, IDUA), IgG1, Clone: [9H133], Mouse, Monoclonal USB-I0706-94C**

|                          |                                                                                                                                                                                                                                                               |

| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Immunogen                | Recombinant protein corresponding to Ala26-Pro653 of human alpha-L-Iduronidase expressed in NS0 cells.                                                                                                                                                        |
| Produktbeschreibung      | Alpha-L-Iduronidase (IDUA) encoded by the IDUA gene is an important enzyme required for the lysosomal degradation of glycosaminoglycans (GAGs). It hydrolyzes the non-reducing terminal alpha-L-iduronic acid residues in GAGs including dermatan sulfate ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [9H133]                                                                                                                                                                                                                                                       |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">P35475</a>                                                                                                                                                                                                                                        |

|              |                                                                                                       |
|--------------|-------------------------------------------------------------------------------------------------------|
| Reinheit     | Purified by Protein G affinity chromatography from hybridoma culture supernatant.                     |
| Formulierung | Supplied as a lyophilized powder from PBS, pH 7.4, 5% trehalose. Reconstitute with 200ul sterile PBS. |
