Anwendungsbeschreibung	PurKine(TM) Protein A/G Resin 4FF has been immobilized for use in IgG purification applications in gravity column procedures at a variety of scales. The Resin consists of 90µm beads of cross-linked 4% agarose, to which Recombinant protein A/G has been coupled. Tests confirm that performance equals or exceeds popular Recombinant protein A/G resins from other suppliers, and no decrease in performance occurs after at least five repeated uses. In addition, its high flow properties make it excellent for scaling-up.
