CheKine(TM) Micro Superoxide Anion Assay Kit ASC-KTB1210

Artikelname	CheKine(TM) Micro Superoxide Anion Assay Kit
Artikelnummer	ASC-KTB1210
Hersteller Artikelnummer	KTB1210
Alternativnummer	ASC-KTB1210-48, ASC-KTB1210-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Produktbeschreibung	Abbkine CheKine(TM) Superoxide Anion Colorimetric Assay Kit is designed for detecting the O ₂ ⁻ content in the sample....
Detektionsbereich	0.001-0.2 mg/mL
Sensitivitaet	0.001 µmol/mL
Tag	Superoxide Anion
Anwendungsbeschreibung	The kit provides a simple method for detecting the O ₂ ⁻ content in a variety of biological samples such as animal tissues, plant tissues, serum, cells . In the assay, The superoxide anion in variety of biological samples reacts with hydroxylamine hydrochloride to produce NO ₂ ⁻ , and NO ₂ ⁻ reacts with Gris reagent. The mechanism of Gris analysis is summarized as the azo coupling between diazoniums, which is It is produced by sulfonamides and NO ₂ ⁻ and N-(1-naphthyl)ethylenediamine dihydrochloride to generate a red azo compound with a characteristic absorption peak at 540nm. The O ₂ ⁻ content in the sample can be calculated based on the A540 value.
