CheKine(TM) Micro Serum Potassium (K+) Assay Kit ASC-KTB2100

Artikelname	CheKine(TM) Micro Serum Potassium (K+) Assay Kit
Artikelnummer	ASC-KTB2100
Hersteller Artikelnummer	KTB2100
Alternativnummer	ASC-KTB2100-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Produktbeschreibung	Abbkine CheKine(TM) Micro Serum Potassium (K+) Assay Kit is designed for detecting Potassium (K+) in the sample....
Tag	K+
Anwendungsbeschreibung	The kit provides a simple method for detecting Potassium (K+) in serum samples. In the assay, potassium ions (K+) react with sodium tetraphenylborate to form potassium tetraphenylborate which is insoluble in water and the turbidity produced is proportional to the potassium concentration within a certain range. So the serum potassium concentration can be determined by measuring its turbidity.
