Human Soluble receptor activator of nuclear factor-kB ligand (sRANKL) ELISA Kit ASC-KTE60208

Artikelname	Human Soluble receptor activator of nuclear factor-kB ligand (sRANKL) ELISA Kit
Artikelnummer	ASC-KTE60208
Hersteller Artikelnummer	KTE60208
Alternativnummer	ASC-KTE60208-48, ASC-KTE60208-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Soluble receptor activator of nuclear factor-kB ligand (sRANKL) ELISA Kit employs a two-site sandwich ELISA to quantitate TNFSF11 in samples. An antibody specific for TNFSF11 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any TNFSF11 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for TNFSF11 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of TNFSF11 bound in the initial step. The color development is stopped and the intensity of the color is measured.
