## Product Datasheet

### Human Spectrin beta chain, erythrocyte (SPTB) ELISA Kit ASC-KTE60350

Artikelname	Human Spectrin beta chain, erythrocyte (SPTB) ELISA Kit
Artikelnummer	ASC-KTE60350
Hersteller Artikelnummer	KTE60350
Alternativnummer	ASC-KTE60350-48, ASC-KTE60350-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Spectrin beta chain, erythrocyte (SPTB) ELISA Kit employs a two-site sandwich ELISA to quantitate SPTB in samples. An antibody specific for SPTB has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any SPTB present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for SPTB is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of SPTB bound in the initial step. The color development is stopped and the intensity of the color is measured.
