EliKine(TM) Human Prostate Specific Antigen (PSA) ELISA Kit ASC-KTE6039

Artikelname	EliKine(TM) Human Prostate Specific Antigen (PSA) ELISA Kit
Artikelnummer	ASC-KTE6039
Hersteller Artikelnummer	KTE6039
Alternativnummer	ASC-KTE6039-48, ASC-KTE6039-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	EliKine(TM) Human Prostate Specific Antigen (PSA) ELISA Kit employs a two-site sandwich ELISA to quantitate Human PSA...
Detektionsbereich	0.078 ng/mL- 5 ng/mL
Sensitivitaet	0.078 ng/mL
Tag	PSA
Proben	Cell culture supernatantsSerumPlasma

Anwendungsbeschreibung

EliKine(TM) Human Prostate Specific Antigen (PSA) ELISA Kit employs a double antibody sandwich method to quantitate Human PSA in samples. An antibody specific for Human PSA has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any Human PSA present is bound by the immobilized antibody. After removing any unbound substances, a HRP-conjugated antibody specific for Human PSA is added to the wells. After washing, remove any unbound HRP-conjugated antibody reagent, adding HRP Substrate (TMB), TMB turns blue under the catalysis of HRP, and turns yellow after adding stop solution. Measure the OD value with a microplate reader at 450 nm wavelength. The Human Carcinoembryonic antigen (PSA) concentration is proportional to the OD450 nm value.
