Human Renin precursor (RENK) ELISA Kit ASC-KTE60807

Artikelname	Human Renin precursor (RENK) ELISA Kit
Artikelnummer	ASC-KTE60807
Hersteller Artikelnummer	KTE60807
Alternativnummer	ASC-KTE60807-48, ASC-KTE60807-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Renin precursor (RENK) ELISA Kit employs a two-site sandwich ELISA to quantitate RENK in samples. An antibody specific for RENK has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any RENK present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for RENK is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of RENK bound in the initial step. The color development is stopped and the intensity of the color is measured.
