### Human Phosphatidylinositol-glycan biosynthesis class F protein (PIGF) ELISA Kit ASC-KTE61212

Artikelname	Human Phosphatidylinositol-glycan biosynthesis class F protein (PIGF) ELISA Kit
Artikelnummer	ASC-KTE61212
Hersteller Artikelnummer	KTE61212
Alternativnummer	ASC-KTE61212-48, ASC-KTE61212-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Phosphatidylinositol-glycan biosynthesis class F protein (PIGF) ELISA Kit employs a two-site sandwich ELISA to quantitate PIGF in samples. An antibody specific for PIGF has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any PIGF present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for PIGF is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of PIGF bound in the initial step. The color development is stopped and the intensity of the color is measured.
