Human Plasmin-antiplasmin complex (PAP) ELISA Kit ASC-KTE61307

Artikelname	Human Plasmin-antiplasmin complex (PAP) ELISA Kit
Artikelnummer	ASC-KTE61307
Hersteller Artikelnummer	KTE61307
Alternativnummer	ASC-KTE61307-48, ASC-KTE61307-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Plasmin-antiplasmin complex (PAP) ELISA Kit employs a two-site sandwich ELISA to quantitate PAP in samples. An antibody specific for PAP has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any PAP present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for PAP is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of PAP bound in the initial step. The color development is stopped and the intensity of the color is measured.
