## Product Datasheet

### Human Myosin-If (MYO1F) ELISA Kit ASC-KTE61421

Artikelname	Human Myosin-If (MYO1F) ELISA Kit
Artikelnummer	ASC-KTE61421
Hersteller Artikelnummer	KTE61421
Alternativnummer	ASC-KTE61421-48, ASC-KTE61421-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Myosin-I $\alpha$  (MYO1F) ELISA Kit employs a two-site sandwich ELISA to quantitate MYO1F in samples. An antibody specific for MYO1F has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any MYO1F present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for MYO1F is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of MYO1F bound in the initial step. The color development is stopped and the intensity of the color is measured.
