Human Myeloid cell nuclear differentiation antigen,MNDA ELISA Kit ASC-KTE61578

Artikelname	Human Myeloid cell nuclear differentiation antigen,MNDA ELISA Kit
Artikelnummer	ASC-KTE61578
Hersteller Artikelnummer	KTE61578
Alternativnummer	ASC-KTE61578-48, ASC-KTE61578-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	This Human Myeloid cell nuclear differentiation antigen,MNDA ELISA Kit employs a two-site sandwich ELISA to quantitate MNDA....
Detektionsbereich	Please inquire

Tag	MNDA
NCBI	4332
UniProt	P41218
Proben	Cell culture supernatantsSerumPlasmaOther biological fluids

Anwendungsbeschreibung

This Human Myeloid cell nuclear differentiation antigen, MNDA ELISA Kit employs a two-site sandwich ELISA to quantitate MNDA in samples. An antibody specific for MNDA has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any MNDA present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for MNDA is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of MNDA bound in the initial step. The color development is stopped and the intensity of the color is measured.
