## Product Datasheet

### Human Mesoderm-specific transcript homolog protein (MEST) ELISA Kit ASC-KTE61645

Artikelname	Human Mesoderm-specific transcript homolog protein (MEST) ELISA Kit
Artikelnummer	ASC-KTE61645
Hersteller Artikelnummer	KTE61645
Alternativnummer	ASC-KTE61645-48, ASC-KTE61645-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Mesoderm-specific transcript homolog protein (MEST) ELISA Kit employs a two-site sandwich ELISA to quantitate MEST in samples. An antibody specific for MEST has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any MEST present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for MEST is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of MEST bound in the initial step. The color development is stopped and the intensity of the color is measured.
