Human 7SK snRNA methylphosphate capping enzyme (MEPCE) ELISA Kit ASC-KTE61651

Artikelname	Human 7SK snRNA methylphosphate capping enzyme (MEPCE) ELISA Kit
Artikelnummer	ASC-KTE61651
Hersteller Artikelnummer	KTE61651
Alternativnummer	ASC-KTE61651-48, ASC-KTE61651-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human 7SK snRNA methylphosphate capping enzyme (MEPCE) ELISA Kit employs a two-site sandwich ELISA to quantitate MEPCE in samples. An antibody specific for MEPCE has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any MEPCE present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for MEPCE is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of MEPCE bound in the initial step. The color development is stopped and the intensity of the color is measured.
