Human Alpha-melanocyte stimulating hormone (A-MSH) ELISA Kit ASC-KTE62449

Artikelname	Human Alpha-melanocyte stimulating hormone (A-MSH) ELISA Kit
Artikelnummer	ASC-KTE62449
Hersteller Artikelnummer	KTE62449
Alternativnummer	ASC-KTE62449-48, ASC-KTE62449-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human

Anwendungsbeschreibung

This Human Alpha-melanocyte stimulating hormone (A-MSH) ELISA Kit employs a two-site sandwich ELISA to quantitate A-MSH in samples. An antibody specific for A-MSH has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any A-MSH present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for A-MSH is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of A-MSH bound in the initial step. The color development is stopped and the intensity of the color is measured.
