| Produktbeschreibung      | The HLA-DRA gene at 6p21.3 is one of the HLA class II alpha chain paralogues, and it plays a central role in the immune system by presenting peptides derived from extracellular proteins. Unlike the alpha chains of other Human MHC class II molecules, ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
