| Spezies Reaktivität      | Rat                                                                                                                                                                                                                                                           |
| Immunogen                | Recombinant rat NKp46 ectodomain coupled to the Fc portion of mouse IgG2b was used as the immunogen for this antibody.                                                                                                                                        |
| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | Rat NKp46 is an activating receptor expressed on all NK cells in all rat strains tested. NKp46 is the defining surface marker for rat NK cells. No expression of NKp46 has so far been reported on non-NK cells in the rat. NKp46 associates with the acti... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [WEN23]                                                                                                                                                                                                                                                       |

|                        |                                             |
