| Immunogen                | A partial length recombinant GLI1 protein (amino acids 881-1,000) was used as the immunogen for this antibody.                                                                                                                                                |
| Produktbeschreibung      | GLI1 or Zinc finger protein GLI1 is a member of the Kruppel family of zinc finger proteins and acts as a transcriptional activator of the sonic hedgehog signal transduction cascade. GLI1 plays important role in developmental processes and also regula... |
