| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Immunogen                | A partial length recombinant ACE2 protein (amino acids 34-223) was used as the immunogen for this antibody.                                                                                                                                                   |
| Produktbeschreibung      | Angiotensin-converting enzyme2 (ACE2) is an ectoenzyme (carboxypeptidase) with an extracellular catalytic domain that predominantly localizes at the plasma membrane and is thereby able to hydrolyze circulating peptides. ACE2 has approximately 42% seq... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
