| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human, Mouse                                                                                                                                                                                                                                                  |
| Immunogen                | A partial length recombinant Viperin protein (amino acids 100-330) was used as the immunogen for this antibody.                                                                                                                                               |
| Produktbeschreibung      | Radical S-adenosyl methionine domain-containing protein 2 is commonly known as Viperin consisting of 43 kDa protein. which is a interferon inducible viral protein. Viperin expression is induced by IFNi, IFNb, IFNg, human cytomegalovirus (HCMV) envelo... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
