| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant HOIP/RNF31 protein (amino acids 780-1020) was used as the immunogen for this antibody.                                                                                                                                           |
| Produktbeschreibung      | RNF31 (ring finger protein 31), also known as HOIP (HOIL-1-interacting protein) is an atypical E3 ubiquitin ligase that belongs to the RBR (RING-between-RING) family of E3 ligases and is the catalytic component of LUBAC (linear ubiquitin chain assemb... |
