| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant LST8/GBL protein (amino acids 100-320) was used as the immunogen for this antibody.                                                                                                                                              |
| Produktbeschreibung      | MLST8 or GbL (G protein beta protein subunit-like) is a subunit of mTORC1 and mTORC2 which regulates cell growth and survival. Both mTORC1 and 2 are activated in response to growth factors or amino acids but mTORC2 is most likely insensitive towards ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
