| Spezies Reaktivität      | Human, Rat                                                                                                                                                                                                                                                             |
| Immunogen                | Peptide sequence around phosphorylation site of tyrosine1092 (P-E-Y(p)-I-N) derived from Human EGFR.                                                                                                                                                                   |
| Produktbeschreibung      | Receptor for EGF, but also for other members of the EGF family, as TGF- $\alpha$ , amphiregulin, betacellulin, heparin-binding EGF-like growth factor, GP30 and vaccinia virus growth factor. Is involved in the control of cell growth and differentiation. Phosph... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                             |
