| Immunogen                | Peptide sequence around phosphorylation site of serine 235 (P-K-S(p)-P-S) derived from Human Tau.                                                                                                                                                             |
| Produktbeschreibung      | Promotes microtubule assembly and stability, and might be involved in the establishment and maintenance of neuronal polarity. The C-terminus binds axonal microtubules while the N-terminus binds neural plasma membrane components, suggesting that tau f... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
