| Immunogen                | Peptide sequence around phosphorylation site of threonine 508 (R-Y-T(p)-V-V) derived from Human LIMK1.                                                                                                                                                        |
| Produktbeschreibung      | Protein kinase which regulates actin filament dynamics. Phosphorylates and inactivates the actin binding/depolymerizing factor cofilin, thereby stabilizing the actin cytoskeleton. Isoform 3 has a dominant negative effect on actin cytoskeletal changes... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
