| Immunogen                | Peptide sequence around phosphorylation site of tyrosine 1059 (P-D-Y(p)-V-R)derived from Human VEGFR2.                                                                                                                                                        |
| Produktbeschreibung      | Receptor for VEGF or VEGFC. Has a tyrosine-protein kinase activity. The VEGF-kinase ligand/receptor signaling system plays a key role in vascular development and regulation of vascular permeability. In case of HIV-1 infection, the interaction with ex... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
