| Immunogen                | Recombinant human full-length WT1 protein                                                                                                                                                                                                                     |
| Produktbeschreibung      | Recognizes a 47-55kDa-tumor suppressor protein, identified as Wilms Tumor (WT1) protein. The antibody reacts with all isoforms of the full-length WT1 and also identifies WT1 lacking exon 2-encoded amino acids, frequently found in subsets of sporadic ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [WT1/1434R]                                                                                                                                                                                                                                                   |
