| Immunogen                | T cells activated with PHA                                                                                                                                                                                                                                    |
| Produktbeschreibung      | Recognizes a 67kDa transmembrane protein which is identified as CD5. The CD5 antigen is found on 95% of thymocytes and 72% of peripheral blood lymphocytes. In lymph nodes, the main reactivity is observed in T cell areas. Anti-CD5 is a pan T-cell mark... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [B-B8]                                                                                                                                                                                                                                                        |
