| Immunogen                | Thymocytes followed by Sezary T cells.                                                                                                                                                                                                                        |
| Produktbeschreibung      | CD8 is a cell surface receptor expressed either as a heterodimer with the CD8 beta chain (CD8 alpha/beta) or as a homodimer (CD8 alpha/alpha). A majority of thymocytes and a subpopulation of mature T cells and NK cells express CD8a. CD8 binds to MHC ... |
