| Immunogen                | HSP70 isolated from bovine brain.                                                                                                                                                                                                                             |
| Produktbeschreibung      | Heat-shock proteins, or stress proteins, are expressed in response to heat shock and a variety of other stress stimuli including oxidative free radicals and toxic metal ions. Sargent et al. identified a duplicated HSP70 locus in the class III region ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
