| Produktbeschreibung      | Human HSP40/DnaJ proteins comprise a large protein family, members of which feature the J domain (named after the bacterial DnaJ protein). The J-domain spans the first 75 N-terminal amino acids and is separated from the C-terminal by a glycine/phenyl... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
