| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Applikation              | ELISA, FA                                                                                                                                                                                                                                                     |
| Produktbeschreibung      | Source: CHO cells. Angiotensin-converting enzyme 2 (ACE2) is an ectoenzyme (carboxypeptidase) with an extracellular catalytic domain that predominantly localizes at the plasma membrane and is thereby able to hydrolyze circulating peptides. ACE2 has a... |
| UniProt                  | <a href="#">P0DTC9</a>                                                                                                                                                                                                                                        |
| Reinheit                 | Greater than 95% by SDS-PAGE.                                                                                                                                                                                                                                 |
| Antibody Type            | Recombinant Antibody                                                                                                                                                                                                                                          |
